FBS US Origin 50ml

831108

Sourced from the United States, this sterile-filtered Fetal Bovine Serum (FBS) provides a consistent foundation for cell culture applications. Every batch undergoes quality control screening for sterility, mycoplasma, and bovine viruses. Additionally, each lot is biologically validated to confirm its ability to support the growth of CHO and HEK293 cell lines. The serum is packaged in 50 mL and 500 mL volumes. Batch-specific Certificates of Analysis (CoA) are available upon request.
