FBS South Origin 50ml

831110

Sourced from South American bovine sources, this sterile-filtered Fetal Bovine Serum (FBS) provides consistent cell culture performance. Prior to release, every batch is tested for sterility, mycoplasma, and bovine viruses. Furthermore, each lot is evaluated to verify its ability to support the growth of HEK293 and CHO cells. The serum is available in 50 mL and 500 mL volumes, and a lot-specific Certificate of Analysis (CoA) can be provided upon request.

PRODUCT DETAILS

Composition table

SPECIFICATIONS
