Defined Fibroblast Maintenance Medium

850205

Defined Fibroblast Maintenance Medium is a serum-free, fully defined medium that keeps human fibroblasts in a stable state rather than driving rapid expansion. It suits secretome, extracellular matrix and compound testing work where serum would interfere. The complete medium contains L-glutamine, human recombinant bFGF and human recombinant insulin. For the expansion of fibroblasts, choose Fibroblast Growth Medium. We offer the medium as 500 ml basal medium, on its own or together with the serum-free supplements, either as individual components or as a premixed Supplement-Mix. The individual components allow single factors to be adjusted or left out, while the Supplement-Mix is added in a single step. Supplements are required for use, and both supplement formats are also available separately.

PRODUCT DETAILS

Phenol-red free	No
Serum content	Serum-free
Recommended	6,000 cells/cm² (initial seeding up to approx. 90 % confluence)

Storage and stability

Store the basal medium at 2–8 °C, protected from light, and the supplements at −20 °C. Avoid repeated freeze-thaw cycles of the supplements. Once supplemented, the medium can be kept at 2–8 °C, protected from light, for up to one month. Do not freeze the medium.

Specification

pH 7.6, osmolality 285 ± 10 mOsm/kg

Supplement components

L-glutamine: 4 mM
Human recombinant bFGF: 1 ng/ml
Human recombinant insulin: 5 µg/ml
Antibiotics (optional): gentamicin 50 µg/ml, amphotericin B 50 ng/ml

Composition table

Supplement volumes for 500 ml of basal medium. The same components are also available premixed in one bottle (Supplement-Mix, Cat. No. 850164, 11 ml).

Component	Volume	Cat. No.
L-glutamine	10 ml	850121
Human recombinant bFGF	0.5 ml	850138
Human recombinant insulin	0.5 ml	850140
Antibiotics (optional)	3.5 ml	850119
Total (without antibiotics)	**11 ml**
